NAME OF YOUNGEST ELIGIBLE WOMAN: _____

We want to talk to women like you who live in Jaunpur so that we can identify the best ways to help your community access family planning, particularly for women who are thinking about having more children in the future. We feel that perspectives from people like you can help to inform policy makers and health service providers in identifying potential barriers to accessing family planning services so that these services may be improved.

If you decide to participate, you will be asked to participate in two individual surveys over a 10-month period. In each survey, you will be asked several questions. Some of them will be about marriage, family planning, pregnancy, and your children. Others will be about education, your friends, and your relationships. If you agree, you will participate in the first survey today, and we will return after 10 months to conduct the second survey with you.

I do not anticipate any physical risks to participating. Your responses to survey questions will be kept confidential, and at no time will your actual identity be revealed. The data you give me will be used for academic publications and may be used as the basis for articles or presentations in the future. That said, we will not use your name or information that would identify you in any publications or presentations. (GO TO QUESTION 5)

Principal Investigators: **Praveen Pathak, Ph.D. and Catalina Herrera-Almanza, Ph.D.**

**Jaunpur Social Networks Study (JSNS) 2018
Field Research Informed Consent Form – Wave I, Baseline Survey**

Please consider this information carefully before deciding whether to continue to participate in this research study.

Objectives:

The purpose of this research is:

- To understand the use of family planning and reproductive health services among married women in Jaunpur, Uttar Pradesh
- To inform the local health sector institutions on how to improve the delivery of family planning and reproductive health services in the community.
- To learn about issues concerning family planning, maternal and child health, and childbearing.
- To collect household-level health, demographic, and socioeconomic information over time.

What you will do in this study:

Your participation is voluntary. If you decide to participate, you will be asked to take part in 2 individual surveys over a 15 month period. Each of these surveys will take approximately 75 minutes. In each survey, you will be asked several questions. Some of them will be about marriage, family planning, pregnancy, and your children. Others will be about education and your relationships. As part of the survey, we will also ask you about your friends and relatives, particularly those with whom you discuss topics around health, family planning, and childbearing. Finally, we will also collect information that will help us to contact you for future interviews. This information includes: your household address and location, your mobile phone number, and the contact information of two people whom you know and who do not live in your household, but would know how to reach you. With your permission, we would also like to take your photo, which will help us to identify and contact you in the future.

If you agree, you will participate in the first survey today, and we will return after 10 months to conduct the second survey with you. By returning after some time, we can learn more about how life changes for families in Jaunpur. The information that we gather from you and from other community members will help us better understand key issues in women and children's health in Uttar Pradesh. You may choose, without any penalty, to skip any questions, to discontinue the survey at any time, or to exclude use of your responses.

Time required:

Administration of the individual survey will take approximately 75 minutes.

Risks:

We do not anticipate any major physical risks to participating. However, some of the questions may cause discomfort or embarrassment. If you do experience any distress, counseling services will be available to you.

Benefits:

This is a chance for you to share your thoughts and experiences regarding marriage, children, fertility, and family planning. It is hoped that your participation will help to inform the community of the local family planning environment and may also help to improve access to family planning services in Jaunpur.

Is there anything else that I need to know?

You may also be eligible to receive additional health information and/or services that are available in Jaunpur.

Confidentiality

Your responses to survey questions will be kept confidential. At no time will your actual identity be revealed. You will be assigned a random numerical code. Anyone who helps me with this research will only know you by this code. The key code linking your name with your number will be kept on a secure computer (for electronic data) or in a locked file cabinet in a locked office in the United States (for paper data), and no one else will have access to it. It will be destroyed as soon as I have finished analyzing your responses to my questions. The data you give me will be used for academic articles that are currently being written and may be used as the basis for articles or presentations in the future. We won't use your name or information that would identify you in any publications or presentations. Your name and other identifying information will always be kept anonymous. Data collected, including your identifiable information, may be seen by the Northeastern University Institutional Review Board (IRB) and the Delhi School of Economics Research Council, both of whom oversees the research.

Participation and withdrawal:

Again, your participation in this study is completely voluntary, and you may refuse to participate or withdraw from the study without penalty. You may withdraw by informing the interviewer that you no longer wish to participate (no questions will be asked). You may skip any question during the survey, but continue to participate in the rest of the study.
